

Deliver Secure Hybrid and Remote Work Business Services

Secure customer data. Protect customer apps. Enable work from anywhere.

- White-label OTT Services.
- Build a sustainable, high-margin business.
- Deliver security and regulatory compliance.
- Provide a second-to-none user experience.

The shift to remote and hybrid work represents unique opportunities for Telcos as organizations seek new, innovative, and cost-effective partners to meet their needs.

Today, it is difficult to find solutions that can deliver business services that are secure, compliant, fast-to-deploy, and flexible enough to provide an 'out of the box' experience without breaking the bank, requiring extensive engineering support, or creating extended delays.

Existing solutions miss the mark, often requiring the service provider to individually evaluate, procure, integrate, manage, and operationally maintain a breadth of siloed technologies. This is simply unsustainable. There is a better way, it's called Tehama.

Disrupt your competition

Tehama's cloud-based platform enables telcos and service providers to seamlessly deploy secure remote and hybrid business services inclusive of policies, relevant apps and services, and desktops anywhere in the world in minutes.

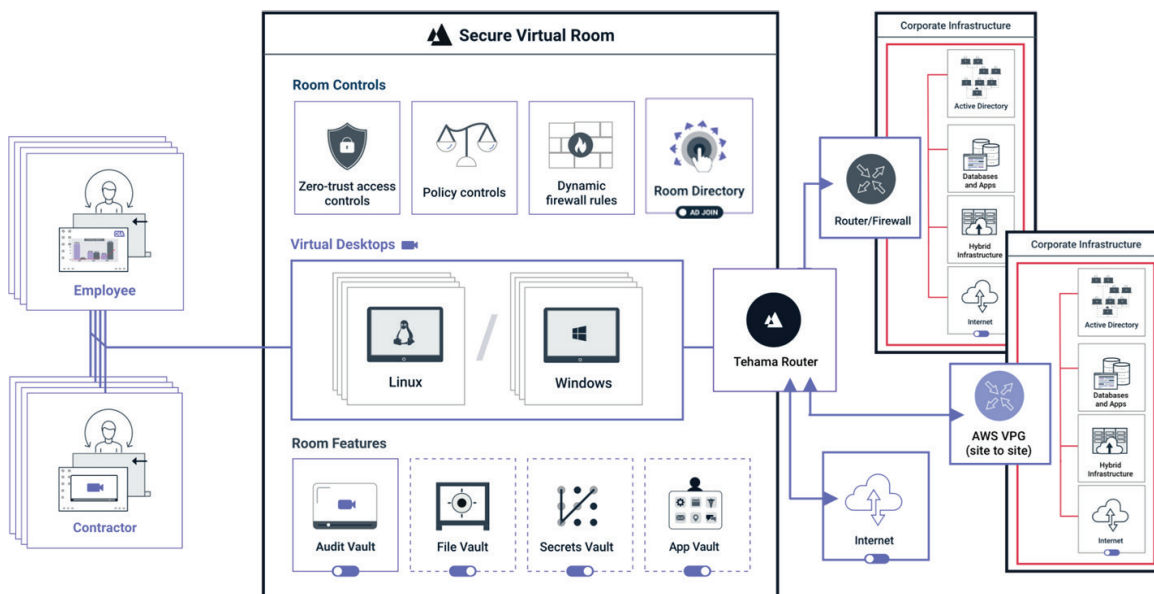

With Tehama, telcos can disrupt the marketplace, broaden their cybersecurity solutions and services, and enable organizations to redirect their spending to more strategic and critical needs.

KEY FEATURES

- OTT-based service, no infrastructure investment
- SOC 2 Type II-compliance
- Proprietary secure perimeter(s) for enterprise-wide compliance
- Zero Trust framework, endpoint isolation, and policy-based access controls
- Role-based access to data and applications with native secure, cloud-based desktops
- Integrated operations, management and reporting

KEY BENEFITS

- Expand and deliver cybersecurity services in minutes
- Securely manage access to your customers' critical data and applications
- Deliver multi-cloud BC/DR services without adding infrastructure
- Streamline regulatory compliance and governance
- Enable organizations to shift IT spend from commodity to strategic needs
- Support flexible 'Bring your own Desktop' environments
- Eliminate risk, complexity and cost
- Respond to end-user needs in minutes

Cybersecurity Services

Data loss and breaches cost organizations millions of dollars in fines and reputational damage. As an over-the-top (OTT) solution, Tehama is simple to deploy, cost-effective, and gets telcos out of the struggle of integrating and maintaining components and into a healthier, more sustainable, secure, and higher margin business.

Comprehensive End-to-End Enterprise Security

Tehama's proprietary 'secure room' enables telcos to provide true, seamless, end-to-end, policy-based security and compliance. Instead of relying on a combination of siloed security technologies, Tehama's native controls, management, and audit capabilities quickly onboard, manage, scale, secure, and audit the global workforce, including third-party users.

Integrated operations, management, and reporting combined with access management tools such as MFA and access policies, including SASE and POLP enforcement, ensure all services provide stringent access based on role, location, and privilege.

Compliance, Regulatory, and Audit Service

With Tehama, improve your customer risk profile and expand your market by providing services that meet specific regulatory requirements, including SOC 2 Type II, GDPR, OSFI, FIPS, 23 NYCRR 500, NIST 800, HIPAA, and more. Session recordings and detailed audit logging provide further visibility into all activities, enabling auditors and risk managers to ensure regulatory and compliance requirements are always met.

Best 'Out of the Box' User Experience

Differentiate your service. Tehama offers second-to-none user experience. Secure workspaces are seamlessly deployed anywhere in the world in minutes, and are inclusive of policies, relevant apps and services. Users can provision, onboard, and immediately start working without the burden of complexity, cost, and increased risk to you or your customers' business.

Secure Third-Party Access

Contains all intellectual property and work assets in secured collaborative environments, eliminating the risk of data theft. The secured perimeter(s) in the Tehama Room(s) allow global remote access to corporate networks and assets, with Zero Trust network segmentation and a holistic security and trust framework.

Secure and Flexible Remote Access

With native integrated VDI/DaaS or optional third-party 'plug and play' desktops, Tehama provides hybrid and remote workers with a secure productivity platform through policy-based access to data and applications. **Zero Trust** access to applications and data hosted on-premises, in the cloud, or a combination of the two keeps workers, their data, and their applications safe. **Audited**, role-based permissions control and monitor access to data and applications. **Built-in end-point isolation** and data loss prevention ensure data is not lost, stolen, or accessed by unauthorized parties. Integrated user **session recordings** pinpoint nefarious activity. **Automated controls** block sensitive data from being exfiltrated.

Business Continuity and Disaster Recovery Service

Delivered as a managed service, Tehama's BC/DR provides an innovative and disruptive service with the fastest RTO, secure, and immediate access to vital business data and applications for remote and hybrid workers during an outage or catastrophe. Easy to provision and offering fast time-to-value with minimal operational overhead, Tehama's BC/DR provides small, medium, and large businesses with enterprise-level protection.

You are the future of hybrid and remote work

The remote hybrid work market is evolving, and so are we. With Tehama Technologies, you're not just a part of the change; you're driving it. Discover how we can help your organization unlock the full potential of remote work while staying ahead in a rapidly evolving market.

It's time to rethink work and how you deliver services. It's time to embrace the future. Together, we can transform the way you work, innovate, and thrive.
